

NPCI/UPI/OC No. 208C/2026 – 27

Apr 23, 2026

To,

All Members of Unified Payment Interface (UPI)

Subject: Addendum to OC 208, 208A & 208B – Implementation of NRP & PRD process & arbitration guidelines

Reference may be drawn from NPCI/UPI/OC No. 208/2024–25 dated 03rd Oct 2024, NPCI/UPI/OC No. 208A/2025–26 dated 30th Jun 2025, and NPCI/UPI/OC No. 208B/2025–26 dated 01st Aug 2025, wherein it was communicated that, until the automation process is fully completed for NRP & PRD process, the existing manual procedure will continue to be followed (refer Annexure-D, Point No. iii of NPCI/UPI/OC No. 208A/2025–26 dated 30th June 2025 for details).

1. In view of the above, NPCI is introducing a new functionality in URCS that enables the bulk upload and download of evidence for all the users. A comprehensive process for using the bulk evidence upload & download features along with the rules to be followed has been detailed in Annexure-1.
2. In addition to the above, upload evidence option through URCS front end is enabled for the below dispute stages on both approved and deemed approved transaction.
 - a. Chargeback Raise
 - b. Deferred Chargeback Raise
 - c. Pre-Arbitration Raise
 - d. Deferred Pre-Arbitration Raise
 - e. Wrong Credit Chargeback Raise

Go-Live: The above-mentioned changes will be implemented in URCS with effect from **26th May 2026**.

3. To facilitate swift resolution of the dispute, NRP verdict will be rendered exclusively based on the evidence provided during the chargeback and pre-arbitration stages. This process will be applicable from **26th June 2026**.

It may be noted that the evidence upload shall be allowed only up to Pre – Arbitration stage. Banks should ensure that all the available / necessary evidences are submitted well before Pre – Arbitration stage. System controls shall be implemented in URCS to disable upload of evidence at all arbitration stages effective from **26th June 2026**.

Annexure-2 can be referred for details of the dispute flags for which evidence upload through bulk mode and front end is available.

4. Rules for Pre-Arbitration Raise & Upload Evidence:

a. Remitter Bank Responsibility – The remitting bank should raise a Pre-Arbitration only after the expiry of the TAT of A+2 days, where A is the dispute raised date, provided that the beneficiary bank has not uploaded any evidence or has uploaded invalid, illegible, incorrect evidence. This provision is intended to ensure that the beneficiary bank is afforded adequate opportunity to upload complete and valid evidence through bulk within the prescribed TAT.

b. Beneficiary Bank Responsibility – The beneficiary bank should mandatorily upload all supporting valid evidence within a TAT of A+1 day for the re-presentment of a chargeback or re-presentment of a pre-arbitration to avoid further dispute lifecycle.

Refer Annexure-1, Point 5 which provides illustration table for A+1 & A+2 day TAT.

Note: The existing dispute rules in URCS remain unchanged; the above changes are provisioned exclusively for bulk evidence upload and download functionality.

5. Repository of Evidence: Ensure that all evidence is downloaded on daily basis and stored systematically with an appropriate backup mechanism to maintain a proper repository for future reference.

6. Retention period for accessing the bulk evidence: Users can download evidence in bulk from URCS up to 30 days.

Yours sincerely

SD/-

Enclosed:

Annexure – 1: Key Points

Annexure – 2: Dispute Stages Eligible for Evidence Upload

Annexure – 3: User Manual

Annexure – 1: Key Points

Bulk evidence upload feature

1. Dispute batch ID wise Bulk Evidence Upload in URCS Back-Office

1. After the bulk dispute file (.csv) is successfully processed in URCS, the “**Upload Evidence**” option is available for users alongside the respective dispute batch ID in URCS.
2. User should place all relevant evidence documents in a single folder, compress and upload exclusively in **.ZIP** format. Other archive formats such as .7z, .TAR, .RAR, etc., are not permitted by URCS.
3. The maximum allowable zip folder size for bulk evidence upload is **50 MB**.
4. For batch IDs with large number of disputes, users are advised to split the evidence and upload in multiple frequencies (e.g., Batch ID of 5000 disputes, split the evidence into parts based on file size and ensure the zip folder size is not more than 50 MB).

2. Evidence Filename Specification

1. URCS generates a unique Adjustment Reference “**Adjref**” for all adjustments that are raised and successfully settled irrespective of raising partial chargebacks/ representations etc. by users. This reference is updated in the existing column Adjref of the adjustment report. E.g.: HDF_CSB_Arbitration Raise_1253689856
2. Users must use URCS-generated Adjref (not Bankadjref) when naming evidence files, as URCS uses this value to map the evidence to the respective dispute.
3. Each evidence file must not exceed **1 MB**. Larger files will be rejected while the remaining valid files will continue to process.
4. Permitted file formats are .pdf, .doc, .docx, .png, .jpg, .xls, .xlsx only.

Note: Text content in .doc, .docx, .xls, .xlsx is not accepted as valid evidence. These formats must contain images/proper proof/justification for rejecting the dispute.

5. Only one evidence document can be uploaded per dispute in bulk mode. If the user has multiple or large size evidence documents for the same dispute, they must combine them into a single document and convert it into PDF or any other allowed file format as mentioned above. If the same is not possible, the bank may choose to do both dispute raising and evidence upload from front end option.

3. Maker–Checker Workflow

Bulk evidence upload is a mandatory maker & checker process. Refer Annexure-3 for user manual.

1. After adjustments are raised and settled, users must extract the 'Adjref' values from the report and rename evidence files accordingly.
2. The maker should upload dispute batch ID-wise bulk evidence into the URCS.
3. URCS then moves the request to the Checker tray, who must log in URCS, access "Bulk Evidence Approval" menu option and approve the evidence submissions.

4. Rejection Reason Codes

1. Once maker & checker process steps are completed, URCS displays completion status of each evidence irrespective of URCS accepted or rejected them.
2. Rejected evidence will appear as 'Rejected' along with the corresponding reason code and description. The user must resolve the issue and reupload the evidence by following the same process.

Rejection Reason Code	Rejection Reason Code Description
BE1	Mismatch with adjustment record
BE2	Incorrect naming convention
BE3	Invalid file format
BE4	File already accepted
BE5	File size exceeds limit
BE6	Evidence not allowed for this adjustment type

3. Evidence that is successfully processed will appear as 'Accepted' and the reason code fields will remain blank since no issues were encountered.

5. TAT for Bulk Evidence Upload

1. Bulk evidence must be uploaded within A+1 day, where A is the dispute raised date.
2. URCS will not allow any evidence which are attempted to upload after the TAT.
3. The sample table below illustrates the cut-off timelines:

Particulars	Day
Dispute Raised date (A)	Monday, 15:00 hrs (example time)
TATs	
Upload Cutoff date (A+1)	Tuesday, 24:00 hrs
TAT Expiry	From Wednesday, 00:01 hrs

Note: This TAT applies only to upload bulk evidence, not for disputes or any penalty timelines.

Bulk evidence download feature

1. Frequency of Staging the Evidence in Folder

- For the disputes raised in URCS through bulk/front-end option on day A+0 and its evidence uploaded by the users on day A+0 or latest by A+1 (A indicates dispute raise date), URCS will compile and stage all evidence on A+2 day.

Example: If disputes are raised on Monday and the corresponding evidence is uploaded on Monday or Tuesday, the evidence folder will be made available for banks to download on Wednesday morning.

- URCS generates one consolidated folder per day for both DC1 and DC2, containing all evidence of disputes raised and received by banks as a Remitter/Issuer and Beneficiary/Acquirer. Users can download the folder from the menu option 'File Download' and by choosing option File Type as 'Bulk Dispute Evidence File'. By default, URCS will generate evidence folder every day. If the bank does not raise/receive evidence on any disputes on a given day, empty folder shall get generated.
- The evidence folder shall be encrypted in PGP format.

2. Naming Convention for Evidence Folder

The folder structure will follow the format below (XYZ is sample bank code). Users can download evidence in bulk from URCS up to 30 days.

Master Folder	Folder	Sub Folder
Evidence_XYZ_DDMMYYYY.zip	XYZ_DDMMYYYY_DC1.zip	XYZ_REM_DDMMYYYY_DC1.zip
		XYZ_BEN_DDMMYYYY_DC1.zip
	XYZ_DDMMYYYY_DC2.zip	XYZ_REM_DDMMYYYY_DC2.zip
		XYZ_BEN_DDMMYYYY_DC2.zip

Annexure – 2: Dispute Stages Eligible for Evidence Upload

Dispute	Adj Flag	Front End Upload	Bulk Upload
Chargeback Raise	B	Yes	Yes
Deferred Chargeback Raise	FB	Yes	Yes
Re-presentment Raise	R	Yes	Yes
Deferred Re-presentment Raise	FR	Yes	Yes
Pre-Arbitration Raise	P	Yes	Yes
Deferred Pre-Arbitration Raise	FP	Yes	Yes
Pre-Arbitration Declined	PR	Yes	Yes
Deferred Pre-Arbitration Declined	FPR	Yes	Yes
Arbitration Raise	AR	No***	No***
Deferred Arbitration Raise	FAR	No***	No***
Arbitration Continuation	ACC	No***	No***
Fraud Chargeback Raise	FC	Yes	Yes
Fraud Chargeback Representment	FCR	Yes	Yes
Wrong Credit Chargeback Raise	WC	Yes	Yes
Wrong credit Representment	WR	Yes	Yes

***** Evidence in the arbitration stages will be considered up to 1 month from the go-live date 26th May 2026 as mentioned above in page 1 point no. 3.**
